

Minutes of the meeting of the Buffalo Streets and Electric Committee held on January 18, 2017 Meeting called to chair by Art Bartleson, at 4:40 pm. Present Committee member Olin Meador, Mayor Doug Anderson and Public Works Director Art Horst.

Streets Projects

Discussed the following project plans/issues.

Chestnut Street

Moving catch basin to the east to get in from in front of Needhams.

Focus on completing curb and gutter in the west end of town.

Ash Street

Finishing Ash Street with curb and gutter to Oak Street

Enfield Drive

Divert water from cemetery down the east side of Hacker Street. Check on plastic corrugated pipe for putting in ruts. Install chevrons on the corners of Franklin and Enfield.

Check on bids for cleaning ditches and check to see about cutting edges of street (grass & mud) down so that water drains properly to the ditch.

Stop seal coating and start asphaltting as much as possible with same amount of money as we have been spending on sealcoating.

Electric Utility

Committee discussed creating a renewable energy section of the code for the electrical code. Horst provided information from other utility boards. Committee would like to check into the costs for hiring a consultant to review applications and the section of the code.

Meeting adjourned at 6:18
